Pacing Analyzer/ Temporary Cardiac Pacemaker

ADAPTERS Models and Description

Model 4830-

The Model 4830 Autoclavable Adapter has a Redel® connector on the device end and a universal connector on the patient end. It is approximately 22 cm long. It also incorporates a Ferrite Bead.

The Universal™ connector is a molded color-coded pair of positive closure collet terminals in combination with color-coded, protective pin sockets.

The 4830 adapter fits directly into all Pace Medical products utilizing a Redel connector. For cleaning and sterilizing information contact the Company's web site or your local representative.

Pacing Analyzer/ Temporary Cardiac Pacemaker

ADAPTERS Models and Description

Model 4840-

The Model 4840 Autoclavable Adapter has a Redel connector on the device end and a female Redel connector on the patient end. It is approximately 22 cm long. It also incorporates a Ferrite Bead.

The 4840 adapter fits directly into all Pace Medical products utilizing a Redel connector; devices and Pacing Line cables. For cleaning and sterilizing information contact the Company's web site or your local representative.

Model 4810-

The Model 4810 Adapter converts a collet terminal into a female shrouded 2 mm pin receptacle. The adapter comes with a pair of adapters mounted in a clear plastic frame, which provides ease of use and is a strain relief for cables or patient pacing leads.

Caution: Federal (USA) law restricts the device to use by or on the order of a physician.
